

GAS OIL SUPREME (X01249G0)

DESCRIPTION

Exocet® Gas Oil Supreme is an advanced fuel additive designed to benefit both mineral diesel and biodiesel blends. It prevents deposit formation throughout the fuel delivery system, especially in the injectors and fuel pump, to keep the system clean and running at optimum performance. It also compensates for some of the deleterious effects of a higher FAME content (e.g. tendency for water pickup) and will prevent the agglomeration of biodiesel precipitates that can be the cause of filter blocking and fuel starvation.

BENEFITS

APPLICATION

The additive will counter any negative effects resulting from FAME (biodiesel) content and will avoid increases in fuel consumption due to sticking injectors and wear.

Typical applications are agricultural and horticultural machinery, construction equipment, airport vehicles and fork lift trucks.

The product is formulated from recognised fuel additive components and should not void an engine manufacturer's warranty. In fact, many engine manufacturers now recommend the use of upgrade additives in diesel fuel.

The 2019 Worldwide Fuel Charter states a power ion maximum of 2% and this can be achieved by use of Gas Oil Supreme.

WHEN TO USE

- Vehicle lacks power, misfires or 'runs rough'
- Protection against biodiesel precipitates is required
- Engine manufacturer recommends the use of an additive
- Excessive smoke is observed
- With each fuel delivery

TREATMENT RATIO

1 litre of additive treats 2,000 litres of fuel

All Exocet® branded products are available in a range of sizes to 1,000 litres

FUEL ADDITIVE SCIENCE TECHNOLOGIES LTD

GAS OIL SUPREME (X01249G0)

FEATURES

INCREASED CETANE NUMBER

Benefits:

- Easier starting
- Increased pulling power
- Smoother power delivery
- Reduced visible emissions (smoke)
- Improved combustion efficiency
- Aligns with modern engine calibrations
- Reduces the load on a DPF

REDUCED DEPOSIT FORMATION

Benefits:

- Keeps injectors clean in high pressure common rail engines
- Prevents injector sticking and over fuelling
- Maintains injector spray pattern
- Prevents nozzle coking in older engines
- Reduces fuel consumption & emissions
- Protects against corrosion
- Disperses soft particles, including biodiesel precipitates to prevent fuel filter blocking

INCREASED FUEL LUBRICITY

Benefits:

- Compensates for sulphur reduction
- Protects against premature wear in fuel pumps and fuel injectors
- Reduces friction

ENHANCED WATER RESISTANCE

Benefits:

- Prevents emulsions forming and resultant filter blockages
- Keeps water out of the fuel

WHEN TO USE

- Vehicle lacks power, misfires or 'runs rough'
- Protection against biodiesel precipitates is required
- Engine manufacturer recommends the use of an additive
- Excessive smoke is observed
- With each fuel delivery

TREATMENT RATIO

1 litre of additive treats 2,000 litres of fuel

All Exocet[®] branded products are available in a range of sizes to 1,000 litres
